

EECS 582 Final Project

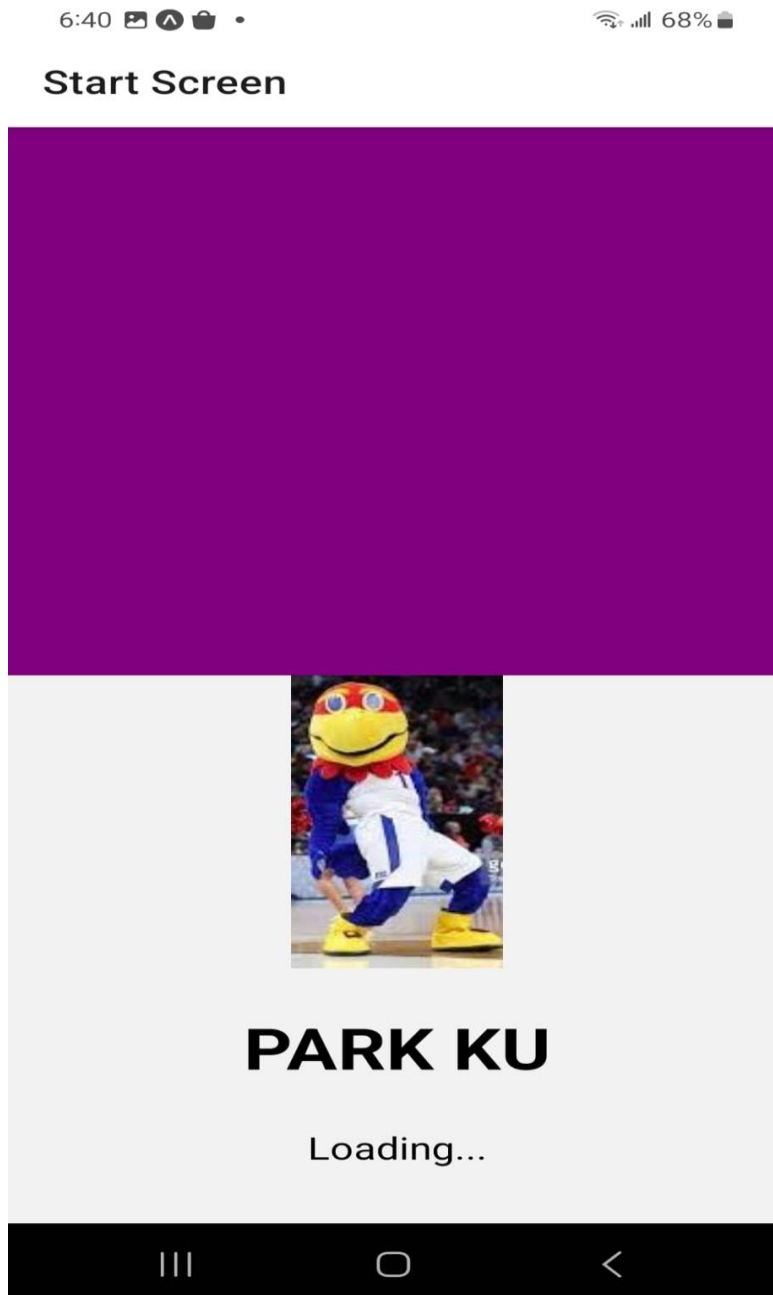

Team 18

Project Artifacts

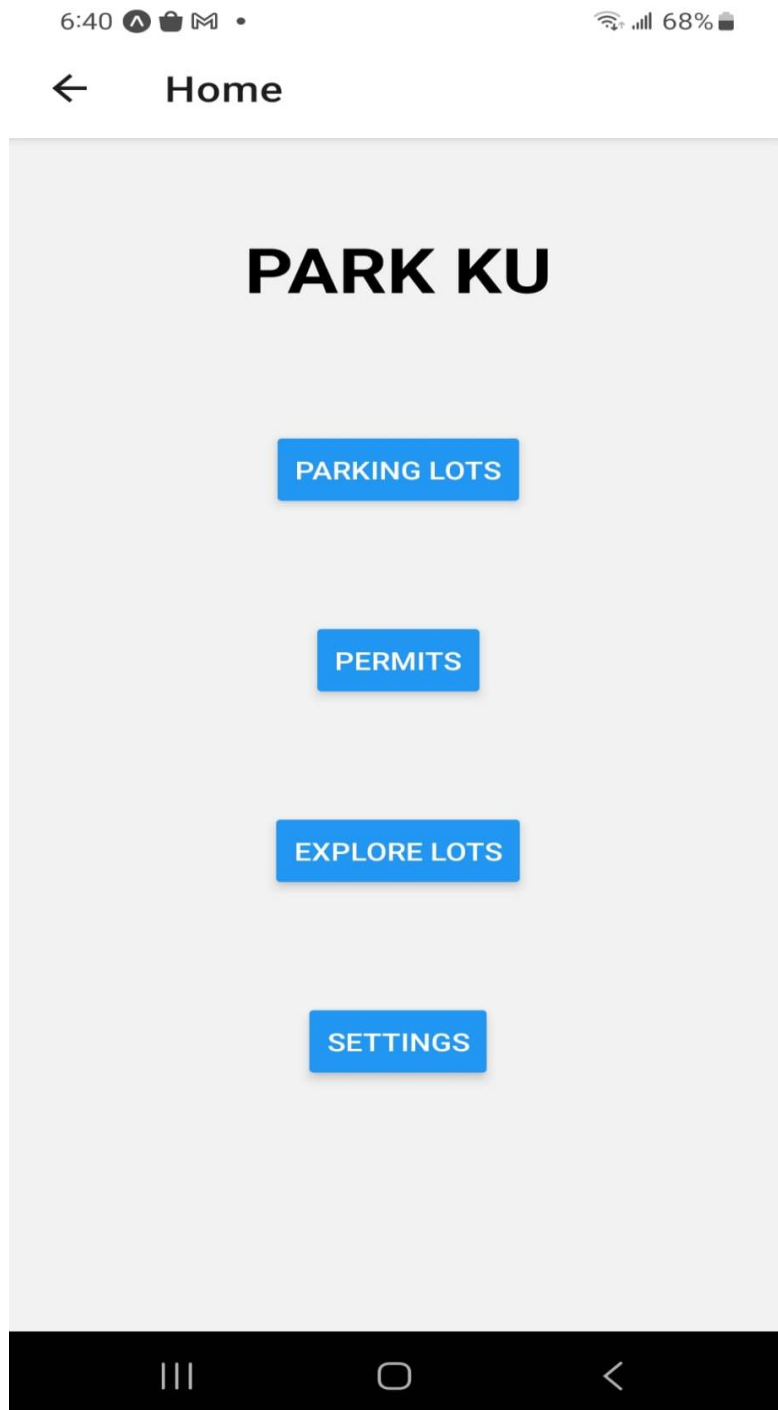

We have coded half of the screens and have finalized the user interface for them as well. UI might be adjusted as we move forward, and minor changes to the screens might be needed as we make progress.

We have been able to create and design the following screens:

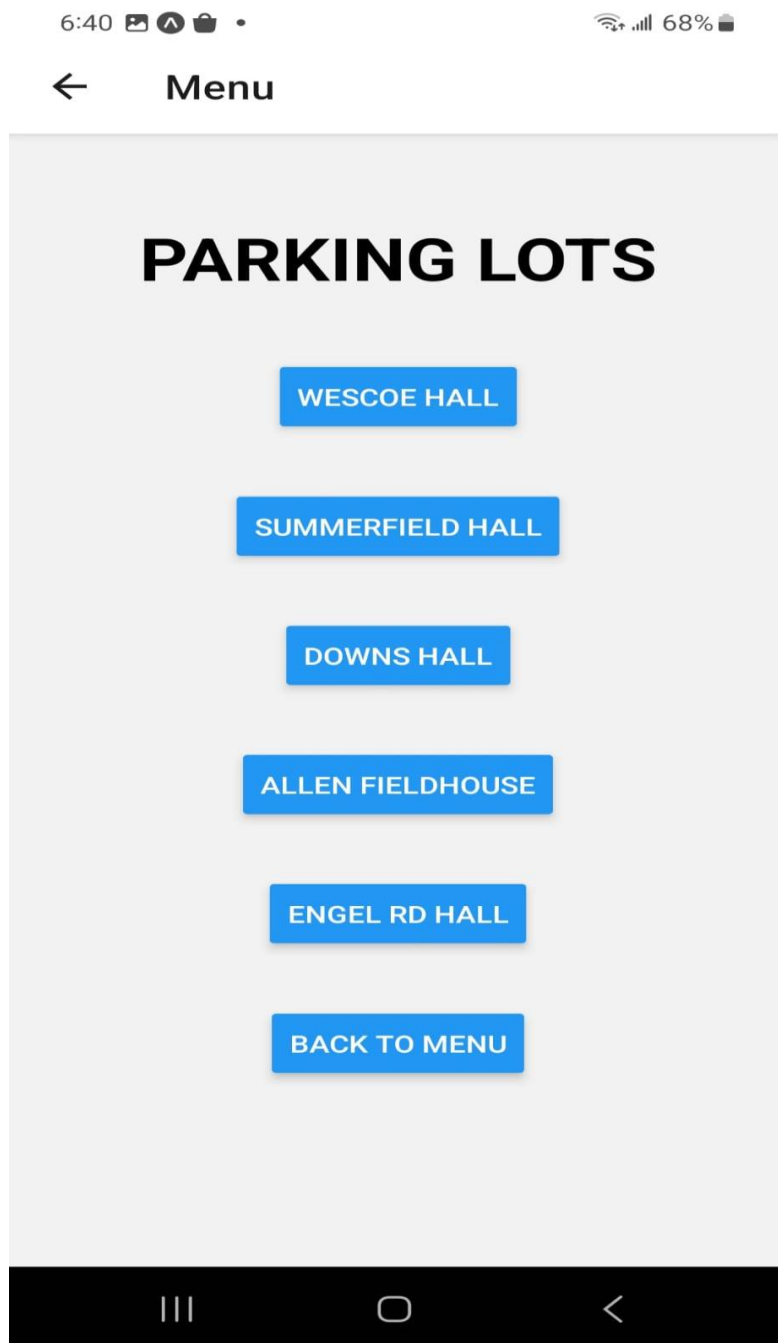

1. Home Screen:

2. Menu Screen:

3. Parking Lots Screen:

Navigation:

Navigation has been added to the screens as well. From home screen, once we have moved forward as the app has loaded, we have the menu screen from where we can press the buttons and go to Parking Lots screen. We can also go back to Menu screen too as part of the new navigation feature we have added.
